## **Garden Mirrors: A Great Way to Enhance an Outdoor “Room” on a Budget**

**Blue Marble Designs’ exclusive line of new garden mirrors can make that dull corner of your yard a magical place.**

**Discovery Bay, CA** – Everyone has a part of their yard that needs some help. It’s either too dark, bare or just needs a little freshening up. Garden Mirrors are the ideal accessory to help you add spark to those otherwise dreary areas. The best part is; they’re now available in the US market at prices even the most budget conscious will find appealing.

Blue Marble Designs makes it a snap to decorate your garden, patio or yard with a variety of mirror shapes and frame designs. “Our garden mirrors come in many different styles to please nearly every taste.” says Robert “Bob” Falligant of Blue Marble. “Most of our mirrors are designed to look like an open window but we also have gothic designs which can add drama to an outdoor area.”

If you’re worried about the weather’s effect on your garden mirror – relax, Blue Marble Designs has that covered. “Traditional mirrors are usually made of glass with a silver compound on the back. These don’t hold up in rain, humidity or heat and can break easily. Our mirrors are made of a specialty mirrored acrylic and treated frames which make them essentially weatherproof.” says Blue Marble employee Bob Schaueneman, “Just find a spot in your yard or garden to place one or two, sit back and enjoy the reflection of beauty and nature around you.”

As appealing as garden mirrors are, they have been hard to come by in the United States market. Blue Marble Designs has reengineered the product to make it sturdier, but still elegant and offers it at an affordable price. To enquire more about our line of garden mirrors, please see <http://www.bluemarbledesigns.com/products-garden-mirror.asp>.

Blue Marble Designs, LLC is an innovative solutions-based company that designs and sells unique garden and home décor products to the retail trade.
