

Care of Your Garden Mirror

Congratulations! You have purchased a quality garden mirror by Blue Marble Designs. Your garden will now reflect your personal style and be the envy of your neighbors. There are just a few **important** things that you need to know about caring for your new designer garden mirror.

1. Your garden mirror mounts to a wall, fence or other flat surface much like a picture frame mounts to a wall inside your home.
2. To install any decorative window hardware, which comes with some of our mirror designs, place the mirror face down on a flat hard surface and carefully screw the hardware into the pre-drilled holes, being careful not to put excessive pressure on the acrylic mirror .
3. Acrylic plastic WILL SCRATCH if not cleaned properly. In most cases, rinsing your garden mirror with water will provide satisfactory cleaning results. If you need to clean the mirror, wash the surface with warm water, a soft cloth and a mild soap.
4. Never use anything abrasive on the acrylic surface of your garden mirror. Never use paper products to clean your garden mirror; they will scratch the acrylic surface. Never use harsh chemicals or solvents to clean your mirror.
5. Your garden mirror should give you many years of enjoyment if cared for properly.
6. For best results, your garden mirror should be mounted on a surface where it will reflect your beautiful garden to the viewer.

Enjoy your Garden Mirror from Blue Marble Designs
